

Remarks

The Official Office Action of May 20, 2005 and the references therein made of record have been carefully considered.

A substitute drawing is attached to make the change shown in red markings on the attached print.

Applicant has amended the specification on pages 7, 8 and 13 to correct obvious informalities. Two errors on page 7, line 14 have been corrected. The last phrase originally read "in which the nipple 22 is threaded." This phrase has two errors. First, it is the nipple 44 that is being discussed. Second, the nipple 44 is not threaded into the end cap as shown in Figure 3. The phrase has been amended to read "into which the nipple 44 slips." It is submitted that this is not new matter, it being disclosed in Figure 3.

Applicant notes that his copy of the application includes two page 6's, meaning that it is likely that two page 6's were filed. It is requested that the Examiner check the application as filed and remove one page six if two are present.

Applicant has amended claim 1 to incorporate the limitations of claim 6 therein.

It is accordingly submitted that this application is in condition for allowance and early steps toward that end are earnestly solicited.

Respectfully submitted,

A handwritten signature in cursive script, appearing to read "G. Turner Moller".
